

Country Gates & Barriers

Specialists in the installation of all types of commercial and residential perimeter security products.

Country Gates & Barriers

WHY CHOOSE COUNTRY GATES & BARRIERS:

- ✓ Forward thinking and efficient
- ✓ Established for over 10 years
- ✓ All of our products and installations are CE marked and certificated
- ✓ All of our engineers are fully trained and accredited
- ✓ 24Hr/365 day emergency call out
- ✓ Expert advice and information at the point of enquiry
- ✓ Full project management from initial design stages through to completion
- ✓ Service and maintenance for peace of mind
- ✓ Excellent aftercare and customer support

The showroom is open Monday to Friday 8am until 5pm or at weekends by pre-arranged appointment.

COMMERCIAL SLIDING GATES

Cantilevered Sliding Gates

Tracked Sliding Gates

Our Sliding Gates, cantilevered or tracked, can span a maximum opening of 12metres.

- » Cantilevered Sliding Gates are trackless & ideal for uneven or sloping entrances.
- » “Cast-in” or “bolt-down” solutions available, either as manual or automated systems.
- » Manufactured with heavy-duty framework, our standard infill options are Palisade, Mesh or Vertical Bars.
- » Our Automated Commercial Sliding Gates fully integrate with any access control or car parking technology.
- » Electro-Mechanical & Hydraulic Automation options available, average usage up to high intensity usage.
- » Low in maintenance, with manual overrides in the event of power failure or emergencies.
- » Available in Galvanised Steel or Aluminium & powder-coated in standard or company corporate colours.
- » Optional extras include razor-wire extensions & anti-climb spikes.
- » Our Commercial Sliding Gate installations are Force-Tested and CE-marked, with full compliance certification handed over on completion of all works.

The showroom is open Monday to Friday 8am until 5pm or at weekends by pre-arranged appointment.

To book your appointment call us on:

Tel: 0161 406 5912

COMMERCIAL SINGLE & DOUBLE SWINGING GATES

Our Automated Commercial Swing Gates can span a maximum opening of 10 metres.

- » “Cast-in” or “bolt-down” solutions available, either as manual or automated systems.
- » Manufactured with heavy-duty framework, our standard infill options are Palisade, Mesh or Vertical Bars.
- » Our Commercial Swing Gates fully integrate with any access control or car parking technology.
- » Electro-Mechanical & Hydraulic Automation options available, average usage up to high intensity usage - which include a built-in hinge, in-ground or above ground systems.
- » Low in maintenance, with manual overrides in the event of power failure or emergencies.
- » Available in Galvanised Steel or Aluminium & powder-coated in standard or company corporate colours.
- » Optional extras include razor-wire extensions and anti-climb spikes.
- » Our Commercial Swing Gate installations are Force-Tested, CE-marked, with full compliance certification handed over on completion of all works.

AUTOMATED VEHICLE BARRIERS

Our Automated Vehicle Barriers fully integrate with any access control or car parking technology.

- » Electro-Mechanical & Hydraulic options available, average usage up to high intensity usage.
- » Spanning entrances from 3 metres up to 16 metres.
- » Low in maintenance, with manual overrides in the event of power failure or emergencies.

- » Available in standard or company corporate colours.
- » Optional extras include a Pogo Tip Support, LED Boom Lights, Barriers Skirts (for above or below the boom, or both), Stop / No Entry Signs and Sensing Safety Edges.
- » Our Automated Barrier installations are Force-Tested, CE-marked, with full compliance certification handed over on completion of all works.

COMMERCIAL FENCING

- » All options are available up to a maximum height of 3 metres.
- » 'Cast-in' or 'bolt-down' Post solutions available.
- » Manufactured with heavy-duty framework, our standard infill options are Palisade, Mesh or Vertical Bars.
- » Powder-coated in standard or company corporate colours.
- » Optional extras include razor-wire extensions & anti-climb spikes.
- » Ideal for schools, colleges and university campus.
- » Storage yards.
- » Industrial estates
- » Garden perimeters to provide a low visual impact but high security fence.

TURNSTILES, PEDESTRIAN GATES & SPEED LANES

- » Large choice of high specification CE approved Turnstiles with 90 degree or 120 degree rotor assemblies.
- » Single, double or triple options available as one-directional or bi-directional.
- » Turnstiles available in a choice of small, mid-height and full-height.
- » Our Turnstiles fully integrate with any access control technology.
- » Low in maintenance, with manual overrides in the event of power failure or emergencies.
- » Available in Galvanised Steel or Stainless Steel & powder-coated in standard or company corporate colours.
- » 'Cast-in' or 'bolt-down' solutions available, either as manual or automated systems.
- » Manufactured with heavy-duty framework, our standard infill options are Palisade, Mesh or Vertical Bars.
- » Our Commercial Swing Gates fully integrate with any access control or car parking technology.
- » Fully Automated, Semi-Automated and Manual Locking systems are all available.
- » Low in maintenance, with manual overrides in the event of power failure or emergencies, if automated.
- » Available in Galvanised Steel or Aluminium & powder-coated in standard or company corporate colours.
- » Optional extras include razor-wire extensions & anti-climb spikes.
- » Our Commercial Pedestrian Gate installations are Force-Tested if fully automated & CE-marked, with full compliance certification handed over on completion of all works.

SPEED GATES

Speed Gates provide a fast, dynamic and secure way to manage your access control. The swing door gates are made with safe transparent tempered glass with a slim design and are available in a range of optional glass heights and lane widths.

- » Bi-directional gates
- » Optional speed settings
- » Auto-locking when no signal is received
- » Manual gate release for unlocking in the event of power failures
- » Auto-reset function
- » Timing function to set different access times
- » Fire alarm controlled exit

AUTOMATED BI-FOLD SPEED GATES

Our Automated Bi-Fold Trackless Speed Gates offer the optimum solution where speed of opening & speed of opening / closing is at a premium.

- » Typical opening speed is twice as fast as an average-speed automated gate system.
 - » All are 100% duty cycle, rated for high intensity usage.
 - » Our Automatic Bi-Fold Speed Gates can span a maximum opening of 8 metres.
 - » Our Automated Bi-Fold Speed Gates fully integrate with any access control or car parking technology.
-
- » Manufactured with heavy-duty framework, our standard infill options are Palisade, Mesh or Vertical Bars.
 - » Electro-Mechanical & Hydraulic Automation options available, average usage up to high intensity usage which include a built-in hinge, in-ground or above ground systems.
 - » Low in maintenance, with manual overrides in the event of power failure or emergencies.
 - » Available in Galvanised Steel or Aluminium & powder-coated in standard or company corporate colours.
 - » Optional extras include razor-wire extensions & anti-climb spikes.
 - » Our Automated Bi-Fold Speed Gate installations are Force-Tested and CE-marked, with full compliance certification handed over on completion of all works.

AUTOMATIC RISING BOLLARDS

- » Manufactured in heavy-duty Mild Steel or Stainless Steel.
- » Powder-coated in standard or company corporate colours.
- » Large choice available covering a moderate level of security right up to crash-tested versions to prevent terrorist attacks.
- » Our Automated Bollards fully integrate with any access control or car parking technology.
- » Low in maintenance, with manual overrides in the event of power failure or emergencies.
- » Our Automated Bollard installations are, CE-marked, with full compliance certification handed over on completion of all works.

MANUAL COMMERCIAL BARRIERS & SWING GATES

MANUAL VEHICLE BARRIERS

- » Spanning Entrances from 3metres up to 9metres.
- » Ideal for securing off unmanned areas.
- » Manufactured with heavy-duty framework.
- » Fishtail counterbalanced for ease of operation and complete with a lockable support, padlock and keys.
- » Available in Galvanised Steel or Aluminium & powder coated in standard or company corporate colours.

MANUAL SWINGING ACCESS GATES

- » Spanning Entrances from 3metres up to 9metres.
- » Manufactured with heavy-duty framework.
- » Double Swing or Single Swing options available.
- » Ideal for securing off unmanned areas.
- » Available in Galvanised Steel or Aluminium & powder coated in standard or company corporate colours.

HEIGHT RESTRICTION BARRIERS

- » Spanning Entrances from 3 metres up to 9 metres.
- » Manufactured with heavy-duty framework.
- » Double Swing or Single Swing options available.
- » Ideal for preventing access for larger vehicles, such as public car parks.
- » Available in Galvanised Steel or Aluminium & powder coated in standard or company corporate colours.

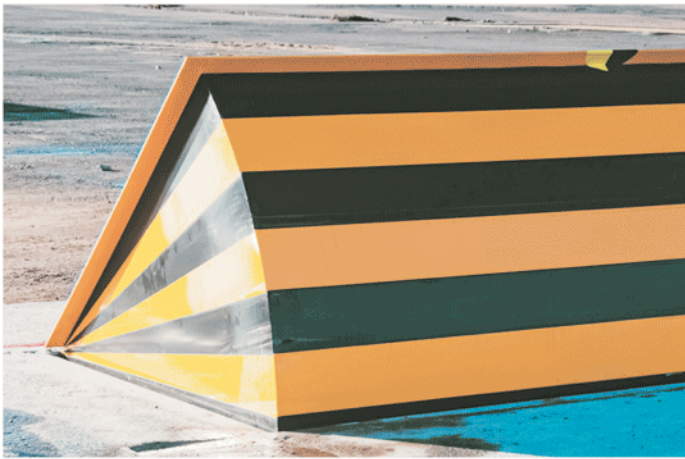

HEIGHT RESTRICTION BARRIERS COMBINED WITH MANUAL SWING GATES

- » Spanning Entrances from 3 metres up to 9 metres.
- » Manufactured with heavy-duty framework.
- » Double Swing or Single Swing options available.
- » Ideal for securing off unmanned areas.
- » Perfect for preventing access for all vehicles, or larger vehicles at other times.
- » Available in Galvanised Steel or Aluminium & powder coated in standard or company corporate colours.

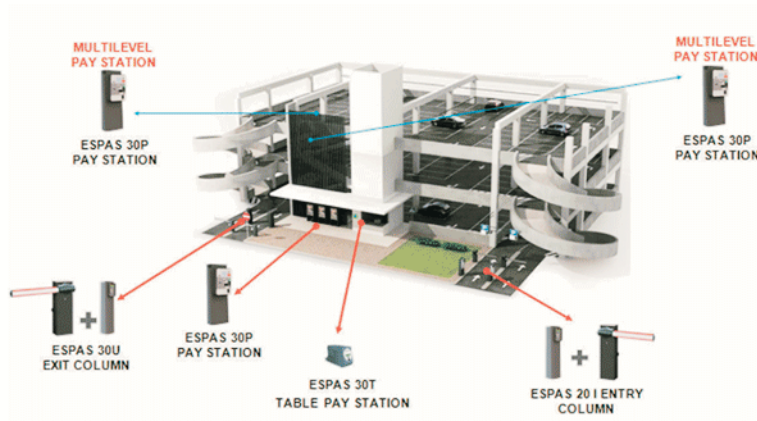

AUTOMATIC RISING KERBS

- » Manufactured in heavy-duty Mild Steel Framework & Chequer-Plate in a Galvanised & Powder-coated finish.
- » Large choice available covering a moderate level of security right up to crash-tested versions to prevent terrorist attacks (PAS68).
- » Our Automated Rising Kerbs fully integrate with any access control or car parking technology.
- » Low in maintenance, with manual overrides in the event of power failure or emergencies.
- » Our Automated Rising Kerb installations are, CE-marked, with full compliance certification handed over on completion of all works.
- » Optional extras include Warning Sirens, Battery back-ups & Warning Signage.

TRAFFIC & CAR PARK MANAGEMENT

- » Large choice of traffic & car-park management solutions available such as coin-based, bar-code ticket & on-line payment accounts.
- » All systems can be fully integrated with all Gates, Barriers and Turnstiles as well as other Access Control options such as ANPR etc.
- » Completely bespoke solutions can be designed upon request.
- » PC-Linked options are also available so that transaction records can be stored, analysed & additional tariff management added.

ANTI-TERRORISM PRODUCTS

- » Our full range of Anti-Terrorism products are available in various PAS-rated Classification Codes, dependent on level of security and risk.
- » PAS-68 Rated Products available, the highest possible PAS-rating for Perimeter Security products to counteract acts of terrorism.
- » Crash Rated PAS 68 Bollards, Barriers & Gates are designed to prevent a 7.5 tonne vehicle borne terrorist / ram-raid threat.
- » Manufactured with heavy-duty framework.
- » Our of our Anti-Terrorism products fully integrate with any access control or car parking technology.
- » Low in maintenance, with manual overrides in the event of power failure or emergencies.
- » Our installations are, CE-marked, with full compliance certification handed over on completion of all works.

ANTI-TERRORISM SLIDING GATE

ANTI-TERRORISM RISING BOLLARD

ANTI-TERRORISM METAL DETECTORS

- » Our full range of Anti-Terrorism Metal Detection products are available and vary in specification, dependant on level of security and risk.
- » Hand-held & stationary types can be used in conjunction and integrated into one entrance system.
- » All have an accurate detection of all metals and are fully compliant with all current Security legislation and standards.
- » All are suited to public environments requiring high security public screening checkpoints, such as schools, performance arenas and stadiums.
- » Our installations are CE-marked, with full compliance certification handed over on completion of all works.

ANTI-TERRORISM METAL DETECTORS

MISCELLANEOUS PRODUCTS

SPEED RAMPS AND FLOW PLATES

- » Offered as a low-cost solution, Speed Ramps and Flow Plates offer a highly effective method of restricting speed.
- » We offer different types, dependent on volume of traffic, type of vehicle, from surface-mounted to more heavy-duty sunken solutions etc.
- » With each of our products, we recommend signage to warn on-coming vehicles to reduce speeds.

STATIC BOLLARDS

- » We offer a huge range, from standard static types through to completely bespoke options.
- » Our range includes bollards of varying materials such as cast-iron, galvanised mild steel, stainless steel and polymer.
- » Design options include milled grooves, mitred or semi-domed tops, as well as being finished in a large selection of colours.

TELESCOPIC/FOLD-DOWN BOLLARDS

- » Our range of Telescopic Bollards, available in galvanised mild steel or stainless steel, with optional powder-coating are either lift-out or fold down types.
- » All types include padlocking facilities, which can be keyed-alike for multiple usage.
- » This type of product is offered as a low-cost solution, to prevent unauthorised vehicle access or vehicle theft from a property without the need for Automation.

WARNING SIGNAGE

- » For all forms of Access Restriction / Control, such as Gates, Barriers, Flow-Plates and Traffic Lights. We always recommend Vehicle Caution Signage for safety purposes, to act as a warning to on-coming vehicles and pedestrians.
- » This is essential to businesses and organisations with access into their grounds, car parks and roadways, in order to fully comply to all current Health and Safety Legislation.
- » Whilst many Warning Signs are standard types we can also advise on bespoke signage and supply to exact requirements.
- » Traffic Lights.

ACCESS CONTROL AND AUTOMATION

ALL PRODUCTS LISTED BELOW CAN BE INTEGRATED WITH ALL TYPES OF PERIMETER SECURITY SYSTEMS SUCH AS AUTOMATIC GATES, DOORS, BARRIERS AND BOLLARDS.

PAXTON NET 2

A centrally controlled PC-based solution integrating internal and external door control with a range of intercom types including video and is ideal for all types of businesses including multi-site operations, educational facilities, sports clubs and car parks.

GSM INTERCOM SYSTEM

GSM Entry systems employ sim-based mobile phone technology as a completely wireless intercom solution to communicate and operate automatic gates, barriers and doors. Typical applications include small or medium sized premises and apartment buildings.

ANPR NUMBER PLATE RECOGNITION

ANPR systems record & register vehicle number plates with CCTV cameras / technology allowing authorised access to designated users. Ideal applications include all types of business premises with car-parks, such as hospitals hotels, leisure centres and marinas.

TOKEN ACCEPTORS

Token Acceptor Machines can be interfaced with any of our automated barriers as well as integrated with other access control options and are an easy and affordable way to control traffic management on secure car parks for all kinds of businesses.

BIOMETRIC SYSTEMS

These systems offer a simple solution using biometric technology to control which staff can access restricted areas as well as providing different levels of clearance and can be fully integrated with Automatic Gates, Doors, Turnstiles etc.

TRAFFIC LIGHTS

Traffic Lights / Signals are positioned at road intersections, to allow for pedestrians crossing and to control competing flows of traffic. Typical applications include all types of perimeter car parks, integrating roadways and pedestrian pathways.

GATE AUTOMATION

We offer a range of Automated Swing and Sliding Gate Systems, hydraulic or electro-mechanical, dependant on requirements such as amount of usage, speed of opening and various other factors.

All of our Installations comply with:

- Machine Directive – 2006/42/EC
- Radio Equipment Directive – 2014/53/EU
- Electro-Magnetic Compatibility Directive – 2014/30/EU
- CE marking regulations – BS EN 13241

To fully comply with the above legislation, safety devices are required to protect all users when being used. These include photocells and Category 3 monitored live safety edges to all points of entrapment, all of which allows us to Force-Test the gate and issue Handover CE-marked Handover Certification on completion.

AUTOMATED DOMESTIC GATES & RAILINGS

TRADITIONAL

We offer a comprehensive range of 'Traditional' style Gates and Railings, such as a fantastic range of Aluminium types, which are virtually maintenance-free, as well as Wrought-Iron types, which are manufactured from mild steel, galvanised and powder-coated in a choice of colours.

MODERN

With privacy and style in mind, we offer a huge range of 'Modern' Aluminium Gates and Fencing, which are virtually maintenance-free. As well as contemporary minimalistic types, we offer other styles incorporating stainless, glass, lighting or mesh inserts and in a wide choice of colours to match household features.

WOODEN EFFECT

If you are looking for 'Wood or Wooden-effect' Gates and Fencing, we offer a fantastic range of Aluminium types, which are virtually maintenance-free, as well as traditional Hardwood Timber types. Fully-boarded, part-boarded and open-boarded are all available in a style to suit all types of properties.

GARAGE DOORS, ROLLER SHUTTER DOORS & AUTOMATION

Country Gates and Barriers undertake installations of Garage and Roller Shutter Doors of all kinds of styles and types, for all commercial and residential applications, offering Canopy, Retractable, Sectional and Roller Doors, all of which can be fully automated & integrated with any form of gate automation as well.
